

IN SESSION NOTES

PROJECT 8003
 SESSION CCC13
 DATE: 6 MAR 80
 TIME: 0900

PRELIM:

Quinn data: Rver was informed prior to the session that he ~~was~~ had provided very good and verifiable information during CC87. He was informed he would be directed to return to the area of manufacturing and coal ore conveyors he had previously seen, and would then be guided East. He was not to involve himself in minute descriptive detail during his movement, but ~~would~~ was rather to give quick descriptions and continue movement, preferably at an altitude of 500'(+).

45 seconds into session a drill starts!!

#1 storage tank shapes - dress r. dress

< 2 min. missed.

like a

#2 +10 " big rubber belt - over roller - metal chert on it
 sheet iron buildings

#2 multiple steam lines on stands also gnd!!

+12 likely its a power plant with
 steam lines and conveyors

+13 Fred sends him E. for first time

looks like a ~~ore~~ pile?

big pile of stuff more gray than black but not
 coal - its a pile of iron ore or limestone

~~E. one more~~

★ +15 on a shady side of a big bldg
abandoned tractor tread - big metal belts
coiled up next to bldg - some double
backed once.

E. one more

★ #3 +20 metal stacks - like pointing stacks to
exhaust hydrocarbons high above plant
long metal buildings

★ flash of ~~red~~ cool or one unloading in
this vic.

E. one more

★ +22 to L (N.) is shape remind me of sus-
pension bridge shape
to R is glowing again

★ lot of pipes laid out parallel like
painted ancient boards (only 100's of
times bigger)

+25 a face superimposed over pipes -
(just geo. Washington then staker)

E. one more

On ground - up in air

★ +28 a marshalling yard/travis

★ a big brick stack below
parallel long buildings to S. of stack

E. one more time

★ little more space to L. Things on posts like
observation (or)

★★ +34 garden spray column - more than one
!!! water cooling plant.

* apt. shapes to S.

E one more time

* * reminds him of inflatable plastic enclosure
to R. - its smooth
~~and~~ all kinds of things
small bldg piles of debris

* big fenced in area with kind of
? to left

complex over lapping cone shapes
some kind of test

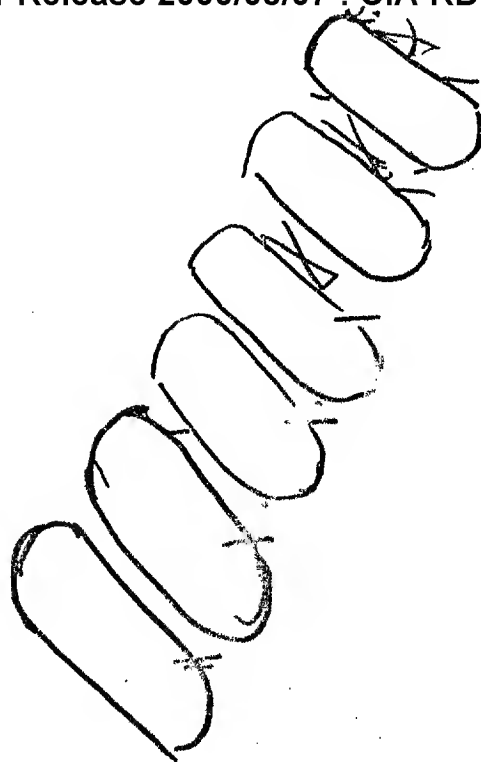

parallel linear pattern coming in from
great distance
spread out
big area & concrete apron thing

★ +44 big rounded tanks - vertical pipes
smaller tubes coming up and turning
south - emitting gas or steam
high pressure - w straight spreading
linear pattern

several vertical tube shapes in row
H = 1.5 times diameter

★★ RR spin loops or cable laid out

+47 HF shaking
